ARIZONA PUBLIC LIBRARY STATISTICS

1983 - 1984

State of Arizona
Department of Library, Archives and Public Records
1985

EXPLANATORY NOTES

1. Population figures for incorporated cities and towns, and larger unincorporated communities, have been taken from sources provided by the Bureau of the Census and the Arizona Department of Economic Security. Figures for the smaller unincorporated communities are estimates made by appropriate county and regional agencies.

2. The population figures given for each county include the following components:

   a. Incorporated cities and towns, city-county and county library service areas;

   b. Unincorporated communities (indented under the city-county and county library); and

   c. County totals for incorporated cities and towns and unincorporated areas.

3. The city population of a city-county library is followed by the population that is the primary responsibility of the county library. This figure includes the population of unincorporated communities that have public library service (listed below the city-county or county library entry), residents of incorporated cities and towns without public library service, and the population of the county that does not have access to site library service. In many counties, libraries serving incorporated cities and towns may also receive services from the county library although this is not reflected in these figures.

4. Staff figures are given for full-time employees (FTE) and volunteers. Figures for part-time employees are not included.

5. The figure under the heading "Book Stock, 6/30/84" is the total number of books that were available to the public as of the date noted. This figure includes the figure given under "Books Added FY 83-84."
